

Avira Antivirus Pro for Android

Security for smartphones and tablets

Although SMARTPHONES AND TABLETS are small and handy – the problems protecting them can be quite large and significant. Unimaginable what could happen if attackers were to gain control of personal user data via the Internet, not to mention the loss of the device, even being stolen.

Avira offers the newest generation of professional all-round protection to anyone who uses their Android device in a private and business capacity.

FEATURES (Selection)

App Scanner

Every app installed is automatically examined for viruses and malware

On-Demand Scanner

A single click allows you to scan files and archives and then remove any contaminated apps or files detected

■ Browse Safely

Infectious websites are blocked - so there is no way you can be duped by "phishing" or other fraudsters

■ Hourly Updates

Mobile devices at risk from the most recent malware? No way – frequent updates ensure that your protection is always up-to-date

■ Quick Support Access

If there is a problem, the Avira experts are there for you

Antitheft Security

No one should have access to your passwords, contacts, photos, emails, chats and contents. With a remote click you can fend off any thief by remote locking

Location Tracking

The position of your device is shown on a map

Remote Scream

This will allow you to find your smartphone if you have mislaid it

Blacklist

Calls and SMS messages from unwanted numbers? No problem – that is what a blacklist is for

Online Device Management

You can view the security status of up to 5 devices, monitor their battery life and make additional settings

■ Premium: These features are not included in the free version of Avira Antivirus Security.

features

Antivirus made simple. Developing antivirus software is complex, but using it doesn't have to be. Pick the user-friendly antivirus solution that offers easy installation, automated scans, intuitive interfaces, one-click repair and a gaming mode that suspends notifications.

"There are many apps which claim to protect a device. But only very few of them actually achieve what Avira manages ... This app is expressly recommended for security-conscious users."
Editor's Review, CNET
