

REPORTING ?

How to get Reports on Watchguard

REPORTING

WatchGuard includes a complete reporting solution able to capture all logs and generate daily reports on the fly. You can use Dimension to see this log data in real-time and track it across your network.

WHATS THE COST

Your annual maintenance includes the software and there is no hidden cost. Simply download the software and install on VMware / HyperV. Connect your firewall and logging will start.

EQUIPMENT NEEDED

WatchGuard Dimension (that's what it is called) runs on VMware ESXi 5.x (64-bit required) or Hyper-V for Microsoft Windows Server 2008 R2, 2012, or 2012 R2 (64-bit required), Download the image and install on your Hardware

NO VMWARE/ HYPERV

If you do not have a server, VMware or HyperV you may call us and we will help you host your reports on our managed cloud service. We will store your hosted reports for up to 30 days free of charge. You can access your reports online and schedule reports to be mailed to you.

HOW TO START

Simply call your trusted Watchguard partner and they will help you getting started
